

Algorithm

```
//prompt user for age and store in a variable.  
//Display the age with a text, "Your age is .... years old"
```

Pseudocode

```
//prompt for age.  
//variable userAge = (age).  
//use function to check if userAge is greater than 18 years old  
//if userAge > 18  
//console.log ("Above 18")  
//use function to check if userAge is less than 18 years old  
//console.log ("Below 18")  
//check if nothing is entered.  
//console.log ("Enter valid integer")
```
